

SEARCH and Educational programs in IES Mayorazgo

SEARCH Sport Education for Active and Responsible Citizenship through Health caring is quite a challenge for a High School like ours.

IES Mayorazgo is a school located in Malaga, Andalusia. The educational offer ranges from secondary education (ESO), high school (Bachillerato) and vocational training (FP). We take part in most of the innovation projects offered by the Junta de Andalucia. We were granted the status of "bilingual school (English/Spanish)" in 2013. Since then, we have been working on our program and promoting bilingual education successfully.

In our bilingual program students are taught some content area subjects partially in English by bilingual teachers. Hence, it renders the adequate framework to develop and implement projects with an international scope such as SEARCH which involve schools, institutions, students and teachers in other countries.

It's more than a year since IES Mayorazgo started working on the ERASMUS+ SEARCH project, and since the very beginning, we think that one of the strongest point of the project is the fact that all materials are being designed **to increase young people awareness of the importance of sports-related issues, potentially resulting in behaviour focused on well-being, inclusion and full citizenship.**

Some of the innovation project our school is taking part in are related to sport and healthy habits (Escuelas deportivas, Aldea, Forma Joven: Hábitos de vida saludable)

The challenge we are facing is to implement SEARCH in other projects that apparently are not related to sport.

SEARCH and COMUNICA

COMUNICA is a school project whose main objective is to improve students' communicative skills from all the different subjects on a common topic.

This year COMUNICA is centered on **the sustainable development goals** .

Goal number 3 is perfect to integrate both projects.

GOAL 3: GOOD HEALTH AND WELL-BEING

Ensuring healthy lives and promoting the well-being for all at all ages is essential to sustainable development.

We launched the SEARCH project from the School library, even before our students got access to the app or the course.

1.- Teachers involved in the SEARCH project and the library team recommended books * on the topic and wrote an entry on the blog.

<https://bookingmaybooks.blogspot.com/2020/12/mens-sana-in-corpore-sana.html>

The recommended books had been chosen taking into account our students' interests, levels and foreign language skills.

2.- Once the students start working with the app they will be invited to recommend books, film book trailers, or record podcasts where sport is related to one of the issues appearing on the test.

SEARCH and Aula de Cine

Aula de cine is a project whose main objective is to develop an audio-visual culture from all different subjects.

Teachers involved in the SEARCH project have selected films - in which sport can be considered as a character- that let them reflect on values, concepts and foster critical thinking among our students through .

Brain diseases and security when practicing sports of impact, cultural differences in sport, social integration through basketball, and a penalty as a symbol of the failure of the communist party are some of the topics than can be discuss with the students with these films.

As in COMUNICA, once the students star working with the app will present a film a associated to any issue appearing on the test.

***Recommended books**
